

IBEC - Your Choice for Complete BPL Solutions

International Broadband Electric Communications, Inc. (IBEC) is the one-stop choice for all broadband-over-powerline (BPL) needs, offering turnkey solutions for broadband Internet access, intelligent networking, and Homeland Security over electric power lines. Using IBEC's licensed technology solutions and established ISP capabilities, utilities can have a BPL system operating quickly and economically, enabling them to offer their customers the reliable broadband services they deserve. In addition, with only modest investment, utilities can use IBEC's solutions to improve their internal energy system efficiency, reduce operating costs, and remotely monitor and secure their facilities via their own broadband power lines.

IBEC is focused on being the premier supplier of cutting-edge products and services for the burgeoning BPL market. Together with utilities, IBEC will close the "digital divide" between well-served and underserved markets – opening the benefits of broadband to everyone.

Why Your Choice is IBEC

- Complete, Turnkey Solutions - Products and Internet Services All in One Package
- The Most Cost-effective BPL Solution Available in the Poweline Industry
- Minimized Utility Investment Required to Install and Operate the BPL System
