

IBEC BPL Homeland Security System

BPL Surveillance & Security System

- **Transformer- or Pole-Mountable for Ease of Installation**
- **Accommodates Multiple, Optional Sensors as Needed**
- **Provides Real-time Reporting to Central Operations Center**
- **Available and Ready for Homeland Security Applications**

Powerline Security and Surveillance

- Critical Resource Monitoring & Protection Via Power Lines
- Real-time Video Surveillance Via Remote, On-site Cameras
- Conditionally Approved by RUS for Full Powerline Installation
- Economical Compared to Other Means of Surveillance
 - Infrastructure is Largely In Place and Available Today
 - Quick and Easy to Deploy, Maintain, and Use
- Flexible - Supports Multiple Environmental Sensors
(Smoke, Radiation, Temperature, Tampering, etc.)
- Self-Securing/Stealthy Due to Powerline Access Method
- Appropriate for Any Remote, Mission-Critical Site
 - Power Substations, Remote Gas and Water Operations
 - Government, Military, and Critical Commercial Sites
 - Operates in Areas Not Served By Other Broadband Solutions
